

Installation guide for TrueLink client

Software requirements

The minimum requirements for using the TrueLink Client are as follows:

- Windows 2003/XP
- Internet Explorer 6.0

Installation of TrueLink client

Choose "Download TrueLink Client" and install the programme:

Download TrueLink Client

You need to use the TrueLink Client to send electronic invoices to public institutions or other companies directly from your ERP system, and to receive electronic invoices from your suppliers directly into your ERP system.

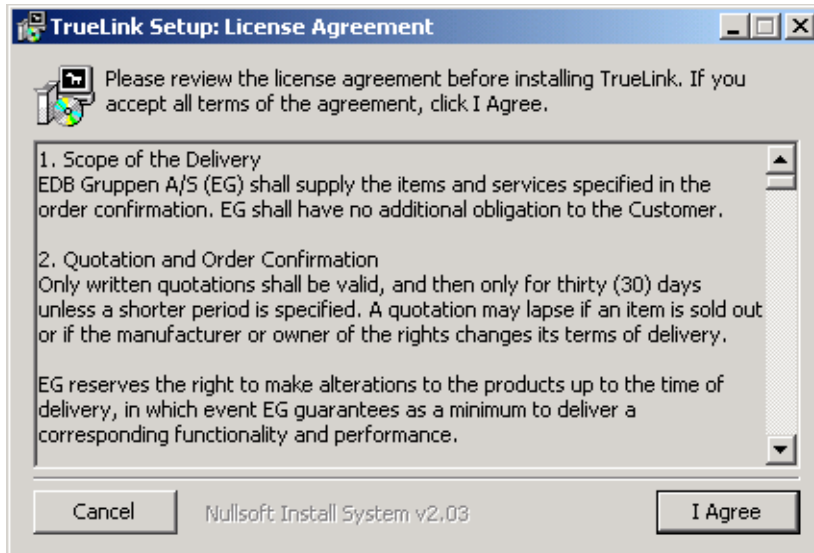

When you install TrueLink client, please follow the [installation guide for TrueLink Client](#).

The installation program will create a number of folders that are used for sending and receiving different document types and document formats. Please see the [user instruction for TrueLink Client](#).

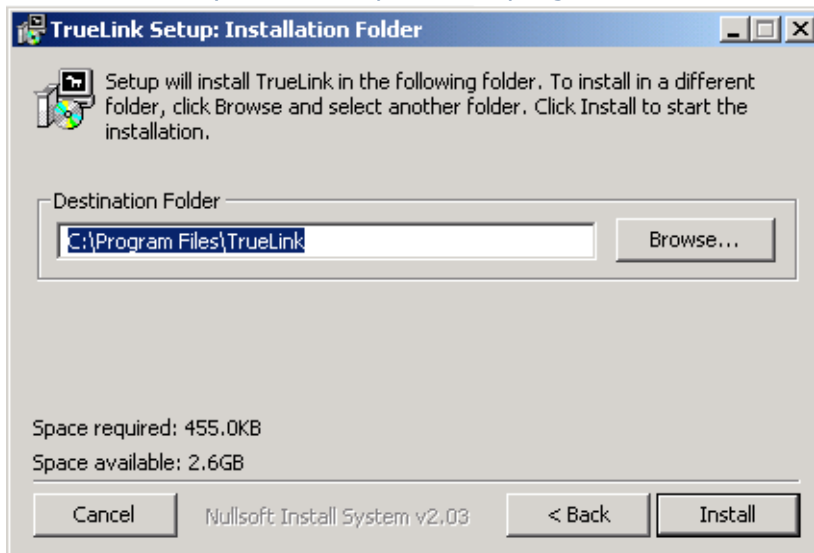

DOWNLOAD TRUOLINK KLIENT

Installation guide for TrueLink client

Read and accept the license terms for TrueLink here. Click on "I accept".

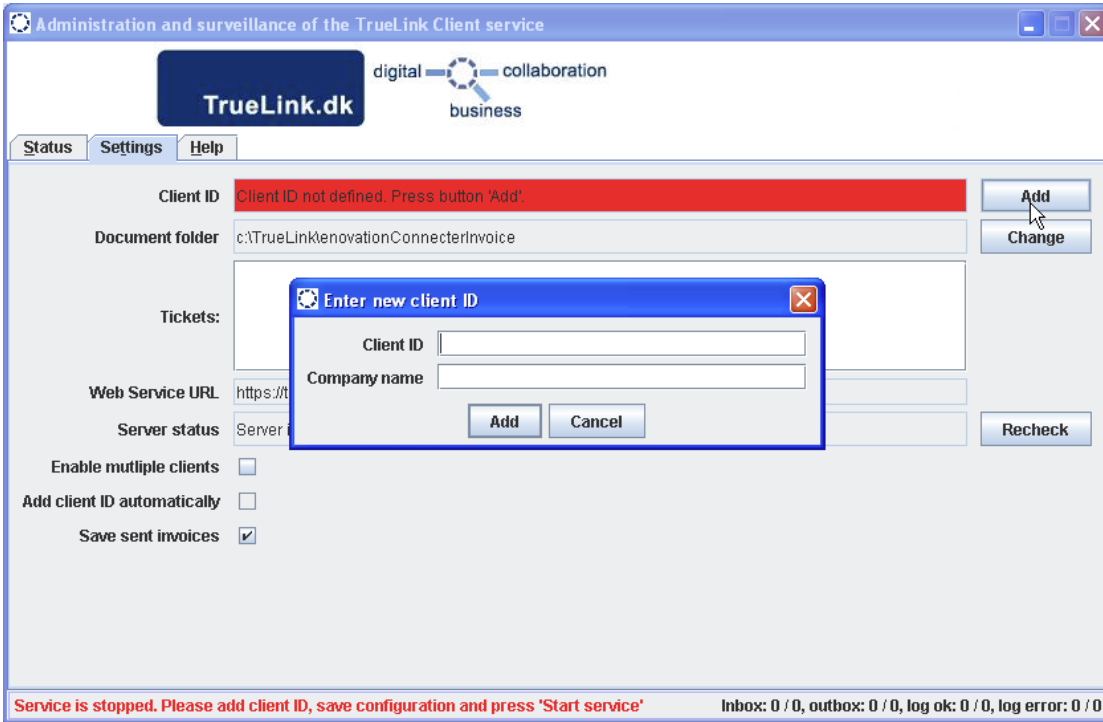

Now choose Destination File, i.e. where the programs are stored. By default C:\Programmer\TrueLink is suggested. You can change this by using "Browse" and select the location where you wish to place the programs. Now choose "Install".

Installation guide for TrueLink client

Now you need to enter the client ID you received when you registered as a user. Remember to press "Add" and "Save" after you have typed the client ID.

Then press "Start service".
